Software engineer with experience working with API's and with testable and reusable components. Strives toward continuous improvements through progressive practices and learning. Desires to work collaboratively within a team environment to develop and support enterprise-level, browser-based software applications. My skills are ReactJS/Redux, NodeJS/ExpressJS, and MongoDB.

EXPERIENCE

Druksys, San Antonio, Texas — React Developer

August 2021 - September 2021

- Created and deployed web pages with ReactJS
- Modified and implemented javascript base code
- Assisted in the testing and coding of new features
- Supported the design of the software, from design through integration
- Setup and managed the database environment
- Developed React and Express scripts to translate data between applications

EDUCATION

Udemy, Online — Javascript: Understanding the Weird Parts

March 2016 - present

I built web applications with HTML, CSS, and Javascript. I learned about data types, high order functions, promises and async/await, loops, the call stack and heap, hoisting, functions, conditionals, and much more.

Udemy, Online — React and Redux

January 2017 - present

I built a single page application with ReactJS and Redux with class components and hooks. Became fluent in NPM, Webpack, Babel, and ES6/ES2015 Javascript syntax.

SKILLS

HTML5, CSS3, Javascript, ReactJS, Redux, NodeJS, ExpressJS, and MongoDB

LANGUAGES

Spanish
